

DAS FAHRWERKSPROGRAMM FÜR HÖCHSTE ANSPRÜCHE

Fahrwerkslösungen für mehr Optik und Fahrdynamik

*Suspension solutions for better optics
and driving dynamics*

THE SUSPENSION PROGRAM FOR
HIGHEST DEMANDS

Das KW Suspensions Lieferprogramm wurde als Ergänzung zum bekannten, individuell anwendbaren KW Gewindefahrwerk entwickelt. Ziel dieses Programms ist es, die vorhandenen Ressourcen, Know-how aus dem Motorsport, den direkten Zugriff auf hochwertigste Materialien in Verbindung mit einer perfekt organisierten Industrieproduktion zur Umsetzung fahrzeugspezifischer Komplettfahrwerkklösungen zu nutzen, optische und fahrdynamische Verbesserungen zu erreichen, Erstausrüsterqualität zu entsprechen und ein hervorragendes Preis-/Leistungsverhältnis zu ermöglichen. Das hieraus resultierende KW Suspensions Komplettfahrwerk entspricht diesen hohen Anforderungen in Bezug auf Funktionalität, Qualität und Preis.

The KW Suspensions program has been developed in addition to the famous KW coilover programme. The aim of this programme is to use the existing resources, the know-how from motorsport, the direct access to high-quality materials and perfect organised industrial production for conversion of car specific sport suspension kits. KW also would like to achieve visual and driving dynamical improvements, meet OEM quality and offer a superb price/performance ratio. The KW sport suspension kits will meet all high claims concerning functionality, quality and price.

KW Suspensions Komplettfahrwerke bestehen aus qualitativ hochwertigen Tieferlegungsfedern und speziell darauf abgestimmten Sportstoßdämpfern, die im Aushub verkürzt und auf die neuen Verhältnisse angepasst sind. Ziel der aufwändigen Fahrversuche ist es, eine optimale Zusammenarbeit der Dämpfer/Federeinheit zu erreichen und deutliche Verbesserungen im Handling und Fahrverhalten zu ermöglichen. Die sportlich harmonische Abstimmung ermöglicht ein hohes Maß an Fahrdynamik und Sicherheit, ohne kompromisslosen Verzicht auf Restkomfort.

- ❑ hochwertige Federn mit speziell abgestimmten Sportstoßdämpfern
- ❑ im Aushub verkürzte Sportdämpfer
- ❑ optimale Zusammenarbeit der Dämpfer/Feder Einheit
- ❑ deutliche Verbesserung im Handling und Fahrbarkeit
- ❑ sportlich, harmonische Abstimmung

KW Sport Suspension kits consist of high-quality springs and specially matched sports shock absorbers with shortened stroke which are aligned to the new ratio. The aim of the extensive driving tests is to achieve an ideal collaboration of the shock and spring units and a significant improvement of the handling and drivability. The sporty, harmonised tuning offers a high degree of driving dynamic and safety without losing the comfort.

- ❑ high-quality springs with specially matched sports shock absorbers
- ❑ sports shock absorbers with shortened stroke
- ❑ optimum interaction between shock absorber / spring unit
- ❑ significant improvement in handling and driveability
- ❑ sporty, harmonised tuning

KW Suspensions Tieferlegungsfedern sind zur Reduzierung der Fahrzeughöhe von bis zu 60 mm geeignet. Neben der optischen Verbesserung trägt der abgesenkte Schwerpunkt zu mehr Agilität und Fahrspaß bei. Tieferlegungsfedern bis 40 mm können mit Seriendämpfern gefahren werden. Generell wird aber der Einsatz von Sportstoßdämpfern empfohlen, für größere Tieferlegung verbindlich vorgeschrieben.

- ❑ Tieferlegung von 40 bis 60 mm, auch Keilform
- ❑ reduzierter Schwerpunkt
- ❑ verbesserte Optik
- ❑ mehr Agilität und Fahrspaß
- ❑ gefertigt in OEM Qualität
- ❑ Chrom-Siliziumstahl

KW Sport Spring kits are suited to lower the car height up to 60 mm. Besides the improved look, the lowered centre of gravity contributes to increased agility and driving pleasure. KW sport spring kits with a lowering up to 40 mm could be used with standard shock absorbers. Generally, it is recommended to use sport shock absorbers. For a lowering of more than 40 mm the use of sport shock absorbers is required.

- ❑ Lowering from 40 to 60 mm, including wedge shape
- ❑ lowered centre of gravity
- ❑ improved looks
- ❑ increased agility and driving pleasure
- ❑ OEM quality according to DIN ISO
- ❑ Chrome-silicium-steel

KW Suspensions Sportstoßdämpfer erfüllen alle Anforderungen eines modernen Hochleistungs-dämpfer-Systems. Alle KW Sportstoßdämpfer werden speziell für den Einsatz im Straßenverkehr mit einer sportlicheren Dämpferabstimmung entwickelt. KW Ingenieure nutzen ihr ganzes Wissen aus der Fahrwerkentwicklung und dem Motorsport, um in aufwändigen Fahrversuchen eine perfekte Abstimmung zu finden. Die 2-Rohr Gasdruckdämpfer werden generell mit gehärteten und verchromten Kolbenstangen bestückt und bieten somit idealen Steinschlag- und Korrosionsschutz. Ein neues, innovatives Monoblock Führungs- und Dichtungspaket erhöht die Druckbeständigkeit, reduziert die Reibung und fördert somit die Leistungsfähigkeit. Die neuen, in V-Form aufgeschrumpften Teflondichtungen der Arbeitskolben reduzieren die Reibungsverluste auf ein Minimum und garantieren für ein äußerst temperaturbeständiges und langlebiges Dämpfungssystem. Sämtliche KW Sportdämpfer sind mit einem Rebound (Aushubverkürzung) versehen, gewährleisten optimale Hubverhältnisse und sorgen für vorgespannte Federn. Ein großer Teil der HA-Dämpfer ist mit über Nuten verstellbaren Federtellern ausgestattet und ermöglichen die Fahrzeughöhe in vier zusätzlichen Positionen zu variieren.

- Kennlinien speziell für den Verwendungszweck
- Know-how aus dem Motorsport
- aufwändige Fahrversuche für optimales Fahrverhalten
- Ergebnisse werden identisch in der Produktion umgesetzt
- optimierte Arbeitskolben mit V-Form Teflonabdichtung
- druckbeständiges Monoblock Führungs- und Dichtungspaket
- extrem reibungsarmes und druckbeständiges System
- hohe Temperaturbeständigkeit und konstante Dämpfungskräfte
- gehärtete und verchromte Kolbenstangen
- hochwertige Bauteile, moderne Fertigungsverfahren und optimale Qualitätskontrollen garantieren Zuverlässigkeit und Haltbarkeit
- im Aushub verkürzte Dämpfer, teilweise über Nuten höhenverstellbare Federteller

KW Sport Shock Absorbers meet all claims of a modern high-performance damping system. All KW sport shock absorbers are specially developed with a sportive damping setting for road-use. KW engineers are using all their knowledge from suspension development and motorsport to find a perfect setting during extensive road testings. The twin-tube gas shock absorbers are equipped with hardened, chrome-plated piston rods and offer ideal protection against stone chips and corrosion. A new innovative monoblock rod guide and seal system raise the pressure resistance, reduce the friction and enhance the capability. The new working piston with V-shaped Teflon seals reduce the friction losses to a minimum and ensure a high temperature-resistant and long-lasting damping system. All KW sport shock absorbers are equipped with a rebound (shortened stroke), assure optimum bore-stroke ratio and arrange pre-stressed springs. A big part of the rear axle shock absorbers is equipped with spring plates which are height adjustable by slots. This enables to vary the car height in 5 additional positions.

- characteristic curves specifically for the intended use
- expertise drawn from motor sport
- extensive road testing for optimum road-holding
- Results are implemented identically in the production process
- optimised working piston with V-shaped Teflon seals
- pressure resistant monoblock guide and seal package
- extremely low-friction and pressure resistant system
- high temperature-resistance and constant damping forces
- hardened, chrome-plated piston rods
- high-quality components, modern production processes and optimum quality control guarantee reliability and durability
- shock absorbers with shortened stroke, in some cases with spring plates height-adjustable by means of slots
